Gears for wind power plants 23 p0484 A79-40119

Test results from the Swedish 60 kW experimental wind power unit 23 p0484 A79-40120

Operating experience with the Magdalen Islands wind turbine 23 p0484 A79-40122

A 200kW vertical axis wind turbine - Results of some preliminary tests 23 p0484 A79-40123

Design and construction of a pilot plant for a shrouded wind turbine 23 p0485 A79-40128

The regulation of an electricity supply system including wind energy generators 23 p0485 A79-40130

Implications of large scale introduction of power from large wind energy conversion systems into the existing electric power supply system in the Netherlands 23 p0485 A79-40132

Wind energy utilization by means of aerogenerators 23 p0522 A79-41220

Composite rotor blades for large wind energy installations 23 p0522 A79-41235

Off-shore based wind turbine systems /OS-WTS/ for Sweden - A systems concept study 23 p0527 A79-41946

Concentration augmentation of power in a Savonius-type wind rotor 23 p0527 A79-41947

Optimal value of the rated speed of a wind generator 23 p0527 A79-41948

Parametric performance analysis of a Darrieus wind turbine system 23 p0536 A79-43676

Reliability of wind power from dispersed sites: A preliminary assessment [LBL-6889] 21 p0176 N79-10547

Transient response to three-phase faults on a wind turbine generator 21 p0180 N79-11312

Nonlinear dynamic response of wind turbine rotors [NASA-TM-78324] 21 p0195 N79-12542

Microprocessor control of a wind turbine generator [NASA-TM-79021] 21 p0195 N79-12548

Lightning protection for the vertical axis wind turbine [SAND-77-1241] 21 p0221 N79-14567

Engineering handbook on the atmospheric environmental guidelines for use in wind turbine generator development [NASA-TP-1359] 21 p0223 N79-14679

Aeroelastic response and stability of a coupled rotor/support system with application to large horizontal axis with turbines 22 p0332 N79-16346

Power train analysis for the DOE/NASA 100-kW wind turbine generator [NASA-TM-78997] 22 p0333 N79-16355

An operating 200-kW horizontal axis wind turbine [NASA-TM-79034] 22 p0333 N79-16357

Oahu wind power survey [PB-287361/0] 22 p0335 N79-16382

A 200-kW wind turbine generator conceptual design study [NASA-TM-79032] 22 p0341 N79-17333

Energy analyses applied to ocean thermal energy conversion and an offshore wind power system 22 p0353 N79-19442

Utility operational experience on the NASA/DOE MOD-OA 200-kW wind turbine [NASA-TM-79084] 22 p0360 N79-20494

Evaluation of MOSTAS computer code for predicting dynamic loads in two bladed wind turbines [NASA-TM-79101] 22 p0368 N79-21549

The use of wind data with an operational wind turbine in a research and development environment [NASA-TM-78332] 23 p0581 N79-26502

Large horizontal axis wind turbine development [NASA-TM-79174] 23 p0581 N79-26504

A low-cost water pumping windmill using a sail type Savonius rotor [PB-294413/0] 23 p0585 N79-26541

Aerodynamic performance of the 17-metre-diameter Darrieus wind turbine [SAND-78-1737] 23 p0595 N79-27670

WINDPOWERED PUMPS

A comparison between sun and wind as energy sources in irrigation plants 21 p0118 A79-17295

An evaluation of the strategy of low cost horizontal axis windmills 21 p0143 A79-17517

Aeroelastic pump --- wind energy from flutter of suspended liquid-filled cables 23 p0406 A79-34055

Load matching effects on wind energy converter performance 23 p0455 A79-37917

A low-cost water pumping windmill using a sail type Savonius rotor [PB-294413/0] 23 p0585 N79-26541

Wind driven water pumps. Economics, technology, current activities [PB-292816/6] 23 p0585 N79-26542

WING TIPS

Free vortices from a wing for wind turbine systems 23 p0537 A79-43683

WINGLETS

Winglets give USAF KC-135 new look in life 22 p0265 A79-23975

WINTER

Design of solar heating system for winter heating of buildings /A case study/ 21 p0139 A79-17486

Comprehensive overview of winter energy data bulletins [PB-282787/1] 21 p0177 N79-10565

Underground storage of natural gas by interstate pipeline companies for 1976 and winter 1976 - 1977 [DOE/EIA-0151] 23 p0597 N79-27684

WIRE WINDING

Theoretical and computational analysis of MHD machines with two-layer windings and half-filled slots and the inductor edges 22 p0298 A79-29286

WOOD

Energy from biomass through hydrolysis of wood 21 p0003 A79-10036

Forest residues as an alternate energy source 21 p0072 A79-14689

Advanced processes for more efficient use of forest products residual material 21 p0096 A79-15919

A theoretical study of wood gasification processes 22 p0257 A79-22923

Observations on the production of methanol and anhydrous ammonia from wood 23 p0386 A79-33230

Use of waste wood in plywood manufacture - A case history 23 p0489 A79-40396

Material and energy balances in the production of ethanol from wood 23 p0495 A79-40745

An evaluation of wood-waste energy conversion systems 21 p0174 N79-10528

Methanol from wood waste: A technical and economic study [FPL-12] 21 p0194 N79-12239

FLAME: Forestry Lands Allocated for Managing energy. Feasibility study [AD-A059993] 21 p0217 N79-14507

Material and energy balances in the production of ethanol from wood --- conferences [CONF-7806139-1] 23 p0589 N79-27338

WORKING FLUIDS

Hydrocarbon working fluid and operating conditions selection for the conventional geothermal binary cycle 21 p0015 A79-10124

The Arbonia control concept - Does flow regulation in the solar system cycle make sense --- working fluid regulation in solar heating facility 21 p0056 A79-13632

Plasma diagnostics in an MHD installation 21 p0106 A79-16492

Performance studies of a finned heat pipe latent thermal energy storage system 21 p0121 A79-17325

Liquid solar collector --- low cost assemblage with black water working fluid 21 p0133 A79-17433

SUBJECT INDEX

ZIRCONIUM ALLOYS

Solar ammonia-water absorption system for cold storage application 21 p0143 A79-17521

Design of a solar energy operated lithium-bromide water absorption refrigeration system for refrigeration storage 21 p0143 A79-17523

Some aspects of the transient response of a flat-plate solar energy collector 21 p0153 A79-18466

Geothermal power and water production studies at the University of California [ASME PAPER 78-WA/ENER-7] 21 p0159 A79-19778

The use of heat exchangers with THERMOEXCEL's tubing in ocean thermal energy power plants [ASME PAPER 78-WA/HT-65] 21 p0162 A79-19825

Using M204 in a solar gas-turbine plant 21 p0167 A79-20357

Effect of the properties of the working body on the selection of the temperature of the surface of the electrodes of the channel of an MHD generator 21 p0167 A79-20419

Study of solid-gas-suspensions used for direct absorption of concentrated solar radiation 22 p0262 A79-23757

Solar energy storage as hydrogen and bromine from hydrogen bromide 22 p0265 A79-24045

Solar system modeling using a modular approach with generalized programs for working fluid properties 22 p0266 A79-24310

Effects of test fluid, flow rate, and flow regime on solar collector thermal performance measurements 22 p0268 A79-24317

Use of organic fluids in solar turbines 22 p0269 A79-24621

Working fluids and turbines for OTEC power systems 22 p0280 A79-26192

Heat transfer in a solar radiation absorbing fluid layer flowing over a substrate 22 p0281 A79-26204

Solar energy application of natural zeolites --- solid absorber-water vapor working fluid system for sorption-refrigeration cycles 22 p0286 A79-27213

Thermal analysis of black liquid cylindrical parabolic collector 22 p0295 A79-28354

Study of refrigeration couples for solar cooling in tropical zone 23 p0383 A79-32960

Power generation experiments of a linear MHD generator with fully ionized seed 23 p0394 A79-33421

Liquid sorbent solar air conditioner 23 p0401 A79-34014

Ocean thermal energy conversion /OTEC/ plant working fluid study 23 p0404 A79-34040

Feasibility study of a regenerative solid polymer electrolyte fuel cell system using hydrogen/chlorine reactants for high efficiency energy storage 23 p0416 A79-34130

Organic synthesis fluids for solar energy systems 23 p0435 A79-35485

On the problem of heat transfer in low-temperature heat pipes 23 p0532 A79-42938

Power cycles and working fluids for low temperature heat sources 22 p0332 A79-16268

Thermal performance evaluation of the Semco (liquid) solar collector [NASA-CR-161230] 23 p0594 A79-27656

WYOMING

In situ coal gasification modeling [UCRL-82269] 23 p0561 A79-24479

X

X RAY ANALYSIS

Flash X-ray tests of solar cells 23 p0498 A79-40899

X RAY IMAGERY

Two-dimensional monochromatic X-ray imaging of laser-produced plasmas --- during implosions for laser fusion 22 p0296 A79-28366

X RAY SPECTRA

Measurements of compressed core density of laser-imploded targets by x-ray continuum-edge shift 21 p0154 A79-18479

Pellet X-ray spectra for laser fusion reactor designs 22 p0291 A79-27878

XENON LAMPS

Proposal for efficient appreciation of solar thermal absorptive materials by high irradiance solar simulator 21 p0130 A79-17406

Y

YAG LASERS

Frequency doubling of a solar pumped Nd:YAG laser 21 p0044 A79-12062

Performance of the short-pulse oscillators for Argus and Shiva 21 p0083 A79-15171

Optical coatings for a space laser communications system 22 p0292 A79-28028

YELLOWSTONE NATIONAL PARK (ID-MT-WY)

Draft environmental statement of the Island Park geothermal area, Idaho, Montana, Wyoming 23 p0551 A79-23551

YOKES

Accounting for the effect of a yoke in an MHD linear induction machine by stipulating boundary conditions of a new kind 22 p0247 A79-21627

YTTRIUM OXIDES

Electrochemical characteristics of ZrO₂-Y₂O₃ solid electrolytes for fuel cells 21 p0039 A79-11813

Z

ZAMBIA

Description of hydro-electric development and proposal for future development on the Zambezi 22 p0340 A79-17323

ZEOLITES

Solar energy application of natural zeolites --- solid absorber-water vapor working fluid system for sorption-refrigeration cycles 22 p0286 A79-27213

The potential of zeolite molecular sieves as hydrogen storage media 23 p0415 A79-34123

ZETA PINCH

Microstability of a focused ion beam propagating through a z-pinch plasma 22 p0270 A79-24817

Plasma behavior near the neutral line between parallel currents --- in planar zeta pinch 22 p0324 A79-31754

ZINC

Thermodynamic and kinetic considerations on zinc-halogen batteries 21 p0040 A79-11822

Electrolysis of zinc. Statistical model of the process parameters for an industrial cell [BLL-RTS-11317] 22 p0345 A79-17984

ZINC COMPOUNDS

100MWh zinc-chlorine peak-shaving battery plants 21 p0011 A79-10096

Photovoltaic effects in II-VI heterojunctions 21 p0042 A79-11967

Zn₃P₂ - A promising photovoltaic material 23 p0502 A79-40927

ZINC SULFIDES

Zn_{1-x}/Cd_{1-x}/S solid solution solar cells 23 p0433 A79-35377

ZIRCONIUM ALLOYS

The effect of induced disorder on the hydrogenation behaviour of the phase ZrCo 22 p0251 A79-21707

PERSONAL AUTHOR INDEX

ENERGY / A Continuing Bibliography (Issue 23)

OCTOBER 1979

Typical Personal Author Index Listing

Listings in this index are arranged alphabetically by personal author. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document listed (e.g., NASA report, translation, NASA contractor report). The issue, page and accession numbers are located beneath and to the right of the title, e.g., 21 p0215 N79-14099. Under any one author's name the accession numbers are arranged in sequence with the A44 accession numbers appearing first.

A

- ABATUT, J. L.**
Analysis and design of a field of heliostats for a solar power plant 22 p0242 A79-21161
- ABBOTT, D.**
Two-junction cascade solar cell characteristics under 1000 concentration ratio and AM 0-AM 5 spectral conditions 23 p0513 A79-41027
Analysis of AlGaAs-GaInAs cascade solar cell under AM 0-AM 5 spectra 23 p0528 A79-42170
- ABDEL-KHALIK, S. I.**
Properties optimization for phase-change energy storage in air-based solar heating systems 21 p0149 A79-18018
Sizing phase-change energy storage units for air-based solar heating systems 23 p0439 A79-36632

Performance characteristics of automotive engines
in the United States. Second series, report no.
6: 1976 Nissan diesel 198 CID (3.2 liters), F. I.
[PB-286295/1] 21 p0227 N79-15309
Performance characteristics of automotive engines
in the United States. Second series, report no.
7: 1977 Ford 171 CID (2.8 liters), 2V
[PB-286296/9] 21 p0227 N79-15310
Performance characteristics of automotive engines
in the United States. First series, report no.
16: 1975 121 CID (2.0 liters), F.I.
[PB-286297/7] 21 p0227 N79-15311
Performance characteristics of automotive engines
in the United States. First series, report no.
17: 1975 Buick 455 CID (7.5 liters), 4V
[PB-286298/5] 21 p0227 N79-15312
- Performance characteristics of automotive engines
in the United States. First series, report no.
18: 1976 Ford CID (6.6 liters), 2V
[PB-286299/3] 21 p0227 N79-15313
Performance characteristics of automotive engines
in the United States. First series, report no.
19: 1975 Ford Windsor 351 CID (5.7 liters), 2V
[PB-286300/9] 21 p0228 N79-15314
Performance characteristics of automotive engines
in the United States. First series, report no.
20: 1975 Chevrolet 350 CID (5.7 liters) with
dresser variable-area venturi system
[PB-286301/7] 21 p0228 N79-15315

An annotated compilation of the sources of information related to the usage of electricity in non-industrial applications

21 p0212 N79-13552

REZNEK, S. R.

Energy/environment technology areas to be developed

21 p0097 A79-16077

REZY, B. J.

Concepts for reducing exhaust emissions and fuel consumption of the aircraft piston engine
[SAE PAPER 790605]

23 p0440 A79-36737

RHEE, S. S.

Development of low-cost, high energy-per-unit-area solar cell modules
[NASA-CR-158556]

23 p0550 N79-23515

RHODEWIZER, R.

Design of superconducting magnets for full-scale MHD generators

21 p0084 A79-15306

RHODES, G. W.

Solar Thermal Electric Program

21 p0112 A79-16730

RHODES, W. J.

Demetallization catalyst tests on heavy residual oils
[PB-285937/9]

21 p0232 N79-15864

RHOTE, W. R.

An evolutionary solar power satellite program
[AAS PAPER 78-153]

22 p0243 A79-21265

RIABIKOV, S. V.

New models of solar cells and prospects for their optimization

21 p0166 A79-20346

Solar-to-thermal energy converter based on coaxial evacuated tubular elements with multilayer and selective coatings

21 p0167 A79-20356

RIAZ, H.

Long-term storage of solar energy in native rock

21 p0120 A79-17314

RIBBING, C. G.

Colored stainless steel - A new type of selective absorber

22 p0294 A79-28150

RIBIERE, P.

Study of low output solar energy power plants
[P/51/77/24]

23 p0585 N79-26537

RICE, C. K.

Analytical methods for evaluating two-dimensional effects in flat-plate solar collectors

21 p0181 N79-11462

RICE, G.

Conversion of a standard single cylinder I.C. engine into a 'gamma' configuration air charged Stirling engine

21 p0024 A79-10202

RICE, I. G.

The combined reheat gas turbine/steam turbine cycle. I - A critical analysis of the combined reheat gas turbine/steam turbine cycle
[ASME PAPER 79-GT-7]

22 p0306 A79-30505

The combined reheat gas turbine/steam turbine cycle. II - The LM 5000 gas generator applied to the combined reheat gas turbine/steam turbine cycle
[ASME PAPER 79-GT-8]

22 p0306 A79-30506

RICE, P. L.

Energy availabilities for state and local development: 1973 data volume

21 p0175 N79-10541

Energy availabilities for state and local development: 1974 data volume

21 p0175 N79-10542

Energy availabilities for state and local development: Projected energy patterns for 1980 and 1985

21 p0186 N79-11511

[ORNL/TM-5890/54]

RICE, R. E.

NaOH-based high temperature heat-of-fusion thermal energy storage device

21 p0012 A79-10106

Phase change thermal storage for a solar total energy system

21 p0120 A79-17321

Development of a phase-change thermal storage system using modified anhydrous sodium hydroxide for solar electric power generation
[NASA-CR-159465]

22 p0354 N79-19454

CORPORATE SOURCE INDEX

ENERGY / A Continuing Bibliography (Issue 23)

OCTOBER 1979

Typical Corporate Source Index Listing

The title of the document is used to provide a brief description of the subject matter. The issue, page number and NASA or AIAA accession number are included in each entry to assist the user in locating the abstract in the abstract section of an individual supplement of *Energy*. If applicable, a report number is also included as an aid in identifying the document.

A

- ABACUS CONTROLS, INC., SOMERVILLE, N. J.**
An inverter/controller subsystem optimized for photovoltaic applications

CONTRACT NUMBER INDEX

ENERGY / A Continuing Bibliography (Issue 23)

OCTOBER 1979

Typical Contract Number Index Listing

Listings in this index are arranged alphanumerically by contract number. Under each contract number, the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged in ascending order with the IAA accession numbers appearing first. The accession number denotes the number by which the citation is identified in either the IAA or STAR section. Preceding the accession number are the issue and page number in the particular supplement in which the citation may be found.

REPORT/ACCESSION INDEX

ENERGY / A Continuing Bibliography (Issue 23)

OCTOBER 1979

Typical Report/Accession Number Index Listing

Listings in this index are arranged alphanumerically by report number. The issue and page number indicate the actual Supplement and page where the citation may be located. The accession number denotes the number by which the citation is identified. An asterisk (*) indicates that the item is a NASA report. A pound sign (\$) indicates that the item is available on microfiche.

PUBLIC COLLECTIONS OF NASA DOCUMENTS

DOMESTIC

NASA distributes its technical documents and bibliographic tools to eleven special libraries located in the organizations listed below. Each library is prepared to furnish the public such services as reference assistance, interlibrary loans, photocopy service, and assistance in obtaining copies of NASA documents for retention.

CALIFORNIA

University of California, Berkeley

COLORADO

University of Colorado, Boulder

DISTRICT OF COLUMBIA

Library of Congress

GEORGIA

Georgia Institute of Technology, Atlanta

ILLINOIS

The John Crerar Library, Chicago

MASSACHUSETTS

Massachusetts Institute of Technology, Cambridge

MISSOURI

Linda Hall Library, Kansas City

NEW YORK

Columbia University, New York

OKLAHOMA

University of Oklahoma, Bizzell Library

PENNSYLVANIA

Carnegie Library of Pittsburgh

WASHINGTON

University of Washington, Seattle

NASA publications (those indicated by an "*" following the accession number) are also received by the following public and free libraries:

CALIFORNIA

Los Angeles Public Library

San Diego Public Library

COLORADO

Denver Public Library

CONNECTICUT

Hartford Public Library

MARYLAND

Enoch Pratt Free Library, Baltimore

MASSACHUSETTS

Boston Public Library

MICHIGAN

Detroit Public Library

MINNESOTA

Minneapolis Public Library

MISSOURI

Kansas City Public Library

St. Louis Public Library

NEW JERSEY

Trenton Public Library

NEW YORK

Brooklyn Public Library

Buffalo and Erie County Public Library

Rochester Public Library

New York Public Library

OHIO

Akron Public Library

Cincinnati Public Library

Cleveland Public Library

Dayton Public Library

Toledo Public Library

TENNESSEE

Memphis Public Library

TEXAS

Dallas Public Library

Fort Worth Public Library

WASHINGTON

Seattle Public Library

WISCONSIN

Milwaukee Public Library

An extensive collection of NASA and NASA-sponsored documents and aerospace publications available to the public for reference purposes is maintained by the American Institute of Aeronautics and Astronautics, Technical Information Service, 555 West 57th Street, 12th Floor, New York, New York 10019.

EUROPEAN

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. By virtue of arrangements other than with NASA, the British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy of microfiche of NASA and NASA-sponsored documents, those identified by both the symbols "*" and "**", from: ESA - Information Retrieval Service, European Space Agency, 8-10 rue Mario-Nikis, 75738 Paris CEDEX 15, France.
